1.2.1 NUMBER OF ADD ON / CERTIFICATES / VALUE ADDED PROGRAM OFFERED DURING THE LAST FIVE YEARS.

ACADEMIC YEAR 2022-2023

Total Number of Courses: 09

S.No	Name of ADD ON / Certificates Programs offered	Course code (If any)	Duration of Course (Hrs)	No of Students Enrolled in the Year
1	PHARMACEUTICAL PATENTS AND INTELLECTUAL PROPERTY STRATEGIES	PPI2201	33	65
2	PHARMACY INFORMATICS: TECHNOLOGY ENHANCED PRACTICE	PIN2202	30	70
3	CHANGE CONTROL IN PHARMACEUTICAL MANUFACTURING PROCESS	CCM2203	31	85
4	SEWAGE DISPOSAL MANAGEMENT IN HOSPITALS AND INDUSTRIES	SDM2204	31	70
5	EVALUATION OF ECONOMIC VALUE OF DRUG THERAPY	EED2205	32	10
6	DOSAGE INDIVIDUALIZATION: INTEGRATION OF PHARMACOMETRICS IN CLINICAL PRACTICE	DID2206	32	7
7	PHARMACEUTICAL METABOLITES	PCP2207	31	14
8	PRECAUTIONS AND CONTROL OF PANDEMIC DISEASES	PMS2208	31	23
9	TIME MANAGEMENT TRICKS USING IQ BASED TECHNIQUES.	TMT2209	30	16

ADD-ON COURSE - SYLLABUS

Course Code : PPI2201

Course Name : PHARMACEUTICAL PATENTS AND INTELLECTUAL PROPERTY STRATEGIES

Date : 11.06.2022 to 30.07.2022 (All Saturday)

Course & Year : B. Pharm Final Year

Course Objective : Indian Patent Act 1970 are to protect and safeguard intellectual products and to encourage the creation of a wide variety of intellectual goods for consumers.

S. No	Topic	Hours
1	**Module-I:** Intellectual Property Rights Introduction, Patent Protection of Drugs, Progressive Economic Growth, Consumer Protection, Safeguard against potential infringement, The Indian Pharmaceutical Industry's Future	8
2	**Module-II:** The Patent Act's and its objectives, Pharmaceutical patent types in India, Awarding of a patent to the inventor, Transfer of patent rights, Patent assignment, Patent Licensees, Important case laws, Priority date and its application format, Common pharmaceutical patent extensions, Common questions about patents and publishing	10
3	**Module-III:** Intellectual Property, Terms of Patent Ownership, Patent Infringement	7
4	**Module-IV:** Patent Infringement, Trademark, Pharmaceutical business and its types	8

Course Outcome:

After the successful completion of this course, the student shall be able to

- They play a pivotal role in shaping the pharmaceutical industry, influencing access to medications, and impacting healthcare systems and patients' lives. Balancing the need for innovation and affordability remains a central challenge in this domain.
- Pharmaceutical patents and intellectual property strategies have multifaceted outcomes that extend beyond the interests of pharmaceutical companies alone.

PHARMACEUTICAL PATENTS AND INTELLECTUAL PROPERTY STRATEGIES

(PPI2201)

Name of Student: Dinesh .T
Course & Year: B. Pharm Final Year
Registration No: 5619940 20
Semester:
Date: 30/07/2022
Marks Secured: 30/30

Answer All Multiple-Choice Questions (10 × 3 = 30)

1. **What is the primary purpose of obtaining a pharmaceutical patent?**
   a. To promote generic drug competition
   (b) To protect the investment in research and development
   c. To limit access to essential medicines
   d. To encourage international drug donations

2. **Which type of intellectual property protection grants exclusive rights to the inventor for a limited period, typically 20 years?**
   a. Copyright
   b. Trademark
   c. Trade secret
   (d) Patent

3. **Which international agreement sets minimum standards for the protection of intellectual property, including pharmaceutical patents?**
   a. Paris Convention for the Protection of Industrial Property
   b. Kyoto Protocol
   (c) TRIPS Agreement
   d. Vienna Convention on the Law of Treaties

4. **What is the term for the period during which a pharmaceutical patent holder has the exclusive right to make, use, and sell the patented invention?**
   a. Lifetime
   b. Indefinite
   (c) Patent term
   d. Monopoly period

Erode Dt.

5. **What strategy is employed by some pharmaceutical companies to extend the exclusivity of a drug beyond the initial patent term?**
   a. Patent trolling
   b. Generic substitution
   c. Ever greening
   d. Parallel importing
6. **Which of the following is NOT a way that a pharmaceutical company can protect its intellectual property?**
   a. Filing for multiple patents on different aspects of a drug
   b. Entering into licensing agreements with competitors
   c. Seeking regulatory exclusivity through FDA approvals
   d. Publishing all research findings in the public domain
7. **What is the purpose of a "patent cliff" in the pharmaceutical industry?**
   a. To promote innovation and competition
   b. To extend the patent term of a drug
   c. To mark the end of a drug's exclusivity, leading to generic competition
   d. To facilitate international patent harmonization
8. **Which entity grants and manages patents for inventions in the United States?**
   a. World Trade Organization (WTO)
   b. United States Patent and Trademark Office (USPTO)
   c. European Patent Office (EPO)
   d. International Trade Commission (ITC)
9. **What is the primary objective of intellectual property strategies in the pharmaceutical industry?**
   a. To increase drug prices
   b. To hinder global access to medicines
   c. To protect and incentivize innovation
   d. To promote counterfeiting
10. **Which of the following is a form of intellectual property protection that does not require registration and relies on keeping information confidential?**
    a. Trademark
    b. Patent
    c. Copyright
    d. Trade secret

PHARMACY INFORMATICS: TECHNOLOGY ENHANCED PRACTICE (PIN2202)

Name of Student: GOPINATH P
Course & Year: B.Pharm Third year
Registration No: 560020516524
Semester:
Date: 24.09.2022
Marks Secured:

Answer All Multiple-Choice Questions (10 × 3 = 30)

27/30

1. **What is the primary goal of pharmacy informatics?**
   a. Enhancing patient counseling techniques
   b. Improving pharmaceutical research methodologies
   c. Integrating technology to improve pharmacy practice
   d. Increasing prescription medication costs
2. **Which of the following is a common application of pharmacy informatics?**
   a. Compounding medications manually
   b. Maintaining paper-based medication records
   c. Using electronic health records (EHR) for patient care
   d. Conducting clinical trials for new medications
3. **What role does "e-prescribing" play in pharmacy informatics?**
   a. It ensures proper medication compounding techniques.
   b. It allows patients to manually fill their prescriptions.
   c. It electronically transmits prescriptions from healthcare providers to pharmacies.
   d. It monitors adverse drug reactions in real-time.
4. **What does the term "interoperability" refer to in pharmacy informatics?**
   a. The ability of different software systems to exchange and use data
   b. The process of dispensing medications to patients
   c. The integration of traditional pharmacy practices with modern technology
   d. The analysis of medication utilization patterns
5. **The analysis of medication utilization patterns**
   a. By increasing the complexity of medication dispensing procedures
   b. By reducing the need for patient education
   c. By providing real-time alerts for potential drug interactions
   d. By decreasing the involvement of pharmacists in patient care

6. **Which technology is commonly used in pharmacy informatics to automate medication dispensing?**
   a. Pneumatic tubes
   b. Fax machines
   c. Rotary phones
   d. Robotic dispensing systems
7. **What is the purpose of a Clinical Decision Support System (CDSS) in pharmacy informatics?**
   a. To automatically bill patients for their medications
   b. To provide entertainment to patients while they wait for prescriptions
   c. To assist healthcare professionals in making informed clinical decisions
   d. To track the location of medication shipments
8. **How does pharmacy informatics contribute to medication reconciliation during care transitions?**
   a. By increasing the use of handwritten medication lists
   b. By ensuring all healthcare providers have access to the same medication information
   c. By replacing medication reconciliation with manual phone calls to pharmacies
   d. By relying solely on patients to remember their medication history
9. **Which regulatory agency in the United States is involved in promoting the use of health information technology, including pharmacy informatics?**
   a. Food and Drug Administration (FDA)
   b. Drug Enforcement Administration (DEA)
   c. Centers for Disease Control and Prevention (CDC)
   d. Office of the National Coordinator for Health Information Technology (ONC)
10. **What is the role of pharmacy informatics in inventory management?**
    a. It eliminates the need for medication inventory altogether
    b. It allows pharmacists to manually count medications daily
    c. It assists in tracking medication usage, reordering, and preventing shortages
    d. It increases the risk of medication expiration

ADD-ON COURSE: ANSWER KEY

Course Code : PPI2201

Course Name : PHARMACEUTICAL PATENTS AND INTELLECTUAL PROPERTY STRATEGIES

Date : 11.06.2022 to 30.07.2022 (All Saturday)

Course & Year : B. Pharm Final Year

ANSWER KEY

1. Answer: b. To protect the investment in research and development
2. Answer: d. Patent
3. Answer: c. TRIPS Agreement
4. Answer: c. Patent term
5. Answer: c. Ever greening
6. Answer: d. Publishing all research findings in the public domain
7. Answer: c. To mark the end of a drug's exclusivity, leading to generic competition
8. Answer: b. United States Patent and Trademark Office (USPTO)
9. Answer: c. To protect and incentivize innovation
10. Answer: d. Trade secret

ADD-ON COURSE - SYLLABUS

Course Code : PIN2202

Course Name : PHARMACY INFORMATICS: TECHNOLOGY ENHANCED PRACTICE

Date : 13.08.2022 to 24.09.2022 (All Saturday)

Course & Year : B. Pharm Third Year

Course Objective : The objective of the module on "Pharmacy Informatics: Technology Enhanced Practice" is to equip participants with a detailed understanding of how information technology transforms and enhances pharmacy practices. This includes Electronic Health Records (EHRs), Medication Management Systems, Clinical Decision Support, Barcoding, Telepharmacy, and other technological advancements.

S. No	Topic	Hours
1	**Module-I:** Introduction, Electronic Health Records (EHRs) and Electronic Medical Records (EMRs), Medication Management Systems, Clinical Decision Support, Barcoding and Medication Administration, Pharmacy Automation, Telepharmacy, Medication Safety and Surveillance, Data Analytics and Reporting, Interoperability and Integration, Regulatory Compliance, Education and Training	8
2	**Module-II:** Hospital Information Systems, computerized provider order entry (CPOE), bar code medication administration (BCMA), automated dispensing systems (ADS), billing systems (BS), and electronic health records (EHR).	8
3	**Module-III:** Outpatient Pharmacy Information Systems, Patient file, Prescriber file, Drug file, Insurance information file and billing interface, e-prescribing interface and Dispensing automation interface.	7
4	**Module-IV:** Pharmacy Automation, Inpatient Pharmacy Automation, Robots, Outpatient Pharmacy Automation	7

Course Outcome:

After the successful completion of this course, the student shall be able to

- The goal is to provide participants with the knowledge and skills needed to integrate and leverage these technologies effectively in pharmacy settings, ultimately enhancing the quality, safety, and efficiency of pharmaceutical car.

PHARMACY INFORMATICS: TECHNOLOGY ENHANCED PRACTICE (PIN2202)

Name of Student: ARAVINDHAN.S **Course & Year:** B.Pharm third year.

Registration No: 560020516509 **Semester:**

Date: 24.09.2022. **Marks Secured:**

Answer All Multiple-Choice Questions (10 × 3 = 30)

24/30

1. **What is the primary goal of pharmacy informatics?**
   a. Enhancing patient counseling techniques
   b. Improving pharmaceutical research methodologies
   c. Integrating technology to improve pharmacy practice
   d. Increasing prescription medication costs

2. **Which of the following is a common application of pharmacy informatics?**
   a. Compounding medications manually
   b. Maintaining paper-based medication records
   c. Using electronic health records (EHR) for patient care
   d. Conducting clinical trials for new medications

3. **What role does "e-prescribing" play in pharmacy informatics?**
   a. It ensures proper medication compounding techniques.
   b. It allows patients to manually fill their prescriptions.
   c. It electronically transmits prescriptions from healthcare providers to pharmacies.
   d. It monitors adverse drug reactions in real-time.

4. **What does the term "interoperability" refer to in pharmacy informatics?**
   a. The ability of different software systems to exchange and use data
   b. The process of dispensing medications to patients
   c. The integration of traditional pharmacy practices with modern technology
   d. The analysis of medication utilization patterns

5. **The analysis of medication utilization patterns**
   a. By increasing the complexity of medication dispensing procedures
   b. By reducing the need for patient education
   c. By providing real-time alerts for potential drug interactions
   d. By decreasing the involvement of pharmacists in patient care

6. **Which technology is commonly used in pharmacy informatics to automate medication dispensing?**
   a. Pneumatic tubes
   b. Fax machines
   c. Rotary phones
   d. Robotic dispensing systems
7. **What is the purpose of a Clinical Decision Support System (CDSS) in pharmacy informatics?**
   a. To automatically bill patients for their medications
   b. To provide entertainment to patients while they wait for prescriptions
   c. To assist healthcare professionals in making informed clinical decisions
   d. To track the location of medication shipments
8. **How does pharmacy informatics contribute to medication reconciliation during care transitions?**
   a. By increasing the use of handwritten medication lists
   b. By ensuring all healthcare providers have access to the same medication information
   c. By replacing medication reconciliation with manual phone calls to pharmacies
   d. By relying solely on patients to remember their medication history
9. **Which regulatory agency in the United States is involved in promoting the use of health information technology, including pharmacy informatics?**
   a. Food and Drug Administration (FDA)
   b. Drug Enforcement Administration (DEA)
   c. Centers for Disease Control and Prevention (CDC)
   d. Office of the National Coordinator for Health Information Technology (ONC)
10. **What is the role of pharmacy informatics in inventory management?**
    a. It eliminates the need for medication inventory altogether
    b. It allows pharmacists to manually count medications daily
    c. It assists in tracking medication usage, reordering, and preventing shortages
    d. It increases the risk of medication expiration

   a. Compounding medications manually
   b. Maintaining paper-based medication records
   c. ✓ Using electronic health records (EHR) for patient care
   d. Conducting clinical trials for new medications

3. **What role does "e-prescribing" play in pharmacy informatics?**
   a. It ensures proper medication compounding techniques.
   b. It allows patients to manually fill their prescriptions.
   c. ✓ It electronically transmits prescriptions from healthcare providers to pharmacies.
   d. It monitors adverse drug reactions in real-time.

4. **What does the term "interoperability" refer to in pharmacy informatics?**
   a. ✓ The ability of different software systems to exchange and use data
   b. The process of dispensing medications to patients
   c. The integration of traditional pharmacy practices with modern technology
   d. The analysis of medication utilization patterns

5. **The analysis of medication utilization patterns**
   a. By increasing the complexity of medication dispensing procedures
   b. By reducing the need for patient education
   c. ✓ By providing real-time alerts for potential drug interactions
   d. By decreasing the involvement of pharmacists in patient care

6. **Which technology is commonly used in pharmacy informatics to automate medication dispensing?**
   a. Pneumatic tubes
   b. Fax machines
   c. Rotary phones
   d. Robotic dispensing systems
7. **What is the purpose of a Clinical Decision Support System (CDSS) in pharmacy informatics?**
   a. To automatically bill patients for their medications
   b. To provide entertainment to patients while they wait for prescriptions
   c. To assist healthcare professionals in making informed clinical decisions
   d. To track the location of medication shipments
8. **How does pharmacy informatics contribute to medication reconciliation during care transitions?**
   a. By increasing the use of handwritten medication lists
   b. By ensuring all healthcare providers have access to the same medication information
   c. By replacing medication reconciliation with manual phone calls to pharmacies
   d. By relying solely on patients to remember their medication history
9. **Which regulatory agency in the United States is involved in promoting the use of health information technology, including pharmacy informatics?**
   a. Food and Drug Administration (FDA)
   b. Drug Enforcement Administration (DEA)
   c. Centers for Disease Control and Prevention (CDC)
   d. Office of the National Coordinator for Health Information Technology (ONC)
10. **What is the role of pharmacy informatics in inventory management?**
    a. It eliminates the need for medication inventory altogether
    b. It allows pharmacists to manually count medications daily
    c. It assists in tracking medication usage, reordering, and preventing shortages
    d. It increases the risk of medication expiration

ADD-ON COURSE: ANSWER KEY

Course Code : PIN2202

Course Name : PHARMACY INFORMATICS: TECHNOLOGY ENHANCED PRACTICE

Date : 13.08.2022 to 24.09.2022 (All Saturday)

Course & Year : B. Pharm Third Year

ANSWER KEY

1. Integrating technology to improve pharmacy practice
2. Using electronic health records (EHR) for patient care
3. It electronically transmits prescriptions from healthcare providers to pharmacies.
4. The ability of different software systems to exchange and use data
5. By providing real-time alerts for potential drug interactions
6. Robotic dispensing systems
7. To assist healthcare professionals in making informed clinical decisions
8. By ensuring all healthcare providers have access to the same medication information
9. Office of the National Coordinator for Health Information Technology (ONC)
10. It assists in tracking medication usage, reordering, and preventing shortages.

ADD ON COURSE FEEDBACK FORM

Name of the student: SOUNDAR. K Course & Year: B.Pharm Third Year

Registration No: 5600205165568 Date: 24.09.2022

Name of the Course: PHARMACY INFORMATICS

Evaluating the Following Questions

1. This Course was interesting

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

2. Was this course useful

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

3. During the course did you find any technical difficulties?

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

4. Did the resource person delivered the information, you didn't know already?

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

5. The subject matter was presented effectively

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

6. The resource person helped me learn about how the course works in the real world

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

7. The resource person provided information I can use to be successful in my career

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

8. Overall how do you rate the Training Program?

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

ADD-ON COURSE - SYLLABUS

Course Code : CCM2203

Course Name :CHANGE CONTROL IN PHARMACEUTICAL MANUFACTURING PROCESS

Date : 12.11.2022 to 31.12.2022 (All Saturday)

Course & Year : B. Pharm Second Year

Course Objective : The objective of the change control process is to ensure that all changes are carefully evaluated, authorized, implemented, and recorded in a controlled manner to reduce potential risks and maintain compliance with regulatory requirements

S. No	Topic	Hours
1	**Module-I:** Introduction and Operation of Change Control Programs, Principles of Change Control, Parallel program, Companywide program	9
2	**Module-II:** Grading the Changes, Trials, Deviations, Change Control Committee, Documentation, Change Requests	10
3	**Module-III: Appendices** A. CMS' Change Control Management Plan Version 1.0 B. Change Management Plan Version 1.0 C. EMA Questions and Answers on Post Approval Change Management Protocols	12

Course Outcome:

After the successful completion of this course, the student shall be able to:

1. Recognize the importance of health informatics and pharmacy informatics in improving the quality and safety of patient care.
2. Recognize the importance of data standards in healthcare systems.

CHANGE CONTROL IN PHARMACEUTICAL MANUFACTURING PROCESS (CCM2203)

Name of Student: Gowrimala . I **Course & Year:** B. Pharm

Registration No: 5600 21516528 **Semester:**

Date: 31 . 12 . 2022 **Marks Secured:**

Answer All Multiple-Choice Questions (10 × 3 = 30)

27/30

1. **What is the primary goal of change control in pharmaceutical manufacturing?**
   a. To reduce manufacturing costs
   (b) To maintain consistent product quality and safety
   c. To expedite the production process
   d. To increase production output

2. **Which regulatory agency provides guidelines and requirements for change control in pharmaceutical manufacturing?**
   a. World Health Organization (WHO)
   b. Food and Drug Administration (FDA)
   c. European Medicines Agency (EMA)
   (d) All of the above

3. **In the context of change control, what does "Change Proposal" refer to?**
   (a) A formal request to make changes to a manufacturing process
   b. A report on the current manufacturing process
   c. A summary of the manufacturing equipment inventory
   d. A list of employees involved in the production

4. **Which of the following is NOT a typical step in the change control process?**
   a. Change proposal review
   b. Implementation of changes
   (c) Document shredding
   d. Post-implementation evaluation

5. **What is the primary purpose of conducting a risk assessment in change control?**
   a. To delay the implementation of changes
   (b) To identify and evaluate potential risks associated with the proposed changes
   c. To increase production speed
   d. To reduce employee training requirements

6. **Which type of change typically requires the most rigorous evaluation and documentation in pharmaceutical manufacturing?**
   a. Administrative changes
   b. Minor process changes
   c. Major process changes
   d. Equipment maintenance

7. **What is the role of the Change Control Board (CCB) in the change control process?**
   a. To implement changes without oversight
   b. To identify changes without evaluation
   c. To review and approve or reject proposed changes
   d. To create change proposals

8. **Which phase of the change control process involves validating and verifying the effectiveness of implemented changes?**
   a. Initiation phase
   b. Evaluation phase
   c. Implementation phase
   d. Post-implementation phase

9. **What is the primary purpose of maintaining a change control log or database?**
   a. To track and document all proposed changes
   b. To keep a record of employee training
   c. To manage production schedules
   d. To analyse manufacturing costs

10. **In the pharmaceutical industry, which key factor should drive the decision to approve or reject a proposed change?**
    a. The cost-saving potential of the change
    b. The impact on product quality, safety, and efficacy
    c. The speed at which the change can be implemented
    d. Employee preferences

ADD-ON COURSE: ANSWER KEY

Course Code : CCM2203

Course Name : CHANGE CONTROL IN PHARMACEUTICAL MANUFACTURING PROCESS

Date : 12.11.2022 to 31.12.2022 (All Saturday)

Course & Year : B. Pharm Second Year

ANSWER KEY

1. Answer: b. To maintain consistent product quality and safety
2. Answer: d. All of the above
3. Answer: a. A formal request to make changes to a manufacturing process
4. Answer: c. Document shredding
5. Answer: b. To identify and evaluate potential risks associated with the proposed changes
6. Answer: c. Major process changes
7. Answer: c. To review and approve or reject proposed changes
8. Answer: d. Post-implementation phase
9. Answer: a. To track and document all proposed changes
10. Answer: b. The impact on product quality, safety, and efficacy

ADD-ON COURSE - SYLLABUS

Course Code : SDM2204

Course Name :SEWAGE DISPOSAL MANAGEMENT IN HOSPITALS AND INDUSTRIES

Date : 12.11.2022 to 31.12.2022 (All Saturday)

Course & Year : B. Pharm First Year

Course Objective : The hospital wastewater treatment plant is to treat the influent (untreated wastewater) generated by the hospitals and healthcare sectors before its direct release into natural environment

S.No	Topic	Hours
1	**Module-I Sewage:** Introduction, Origins of sewage, Sewage services, Collection of sewage, Historical sewage conveyance, Ancient systems, Industrial Revolution era, Design and analysis of collection systems, Sewage management and Sewage treatment.	10
2	**Module-II Sewage treatment:** Process overview, Pre-treatment, Screening, Grit removal, Primary treatment, Secondary treatment, Activated sludge, Trickling filter, Biological aerated filters, Membrane bioreactors, Secondary sedimentation, Tertiary treatment, Rotating biological contactors, Filtration, Lagooning, Nutrient removal, Phosphorus removal, Disinfection, Package plants and batch reactors, Sludge treatment, Digestion, Anaerobic digestion, Aerobic digestion, Composting, Thermal de-polymerization, Incineration, Sewage disposal or water disposal, Waste disposal, Economic importance of sewage Energy from waste, Electricity, Conversion to fertilizer, Waste recycling.	11
3	**Module-III Pharmaceutical waste:** Types of pharmaceutical waste, Pharmaceutical waste reduction and its benefit, Recent studies in pharmaceutical waste management, Risk factors in pharmaceutical field, Sewage disposal in hospital management: Introduction, Hospital Sewage Characteristics, Different types of hospital waste, Cytotoxic and cytostatic waste, Mixed municipal waste, Recyclables, Hospital sewage or wastewater treatment plant process.	10

Course Outcome:

After the successful completion of this course, the student shall be able to:

1. Acquire high knowledge about the sewage disposal management in hospital and industries and hygiene.
2. Have a critical way of thinking based on current health care development.

SEWAGE DISPOSAL MANAGEMENT IN HOSPITALS AND INDUSTRIES (SDM2204)

Name of Student: GANESH KUMAR K
Course & Year: B.pharm FIrst year
Registration No: 560022516525
Semester:
Date: 31.12.2022
Marks Secured:

Answer All Multiple-Choice Questions (10 × 3 = 30)

27/30

1. What are the main characteristics that define sewage?

a) Its color and turbidity✓
b) Its chemical composition and physical condition
c) Its temperature and taste
d) Its source and origin

2. Which of the following is NOT a classification of wastewater based on its origin?

a) Sanitary
b) Commercial
c) Industrial
d) Agricultural✓

3. What is the term used for liquid waste from stores and service establishments that are similar in characteristics to household flows?

a) Sanitary sewage
b) Industrial sewage
c) Commercial sewage✓
d) Surface runoff

4. Why are combined sewage systems generally avoided?

a) They are too expensive to construct.
b) They cannot handle storm water.
c) They reduce the efficiency of sewage treatment plants.✓
d) They are not legally recognized in urban areas.

5. What is the primary purpose of treating storm water before discharging it into waterways?

a) To remove heavy metals
b) To conserve water for reuse
c) To prevent spills and overflows
d) To remove coarse solids and contaminants✓

6. Which type of waste water is characterized by intense and concentrated flows resulting from industrial processes?

a) Sanitary sewage

b) Domestic sewage

c) Industrial wastes

d) Storm water run off

7. What are some potential risks associated with wastewater from various sources?

a) Odor problems and eco-toxicology

b) Nutrient enrichment and wastewater treatment

c) Water conservation and filtration

d) Soil erosion and sedimentation

8. In developed areas, what is grey-water commonly used for?

a) Flushing toilets

b) Watering plants

c) Washing cars

d) Cleaning streets

9. Why might heavy storms overwhelm a sewage treatment system in combined sewers?

a) They increase the amount of household waste.

b) They cause the sewage to flow too quickly.

c) They lead to larger treatment facilities.

d) They contribute more flows than the system can handle.

10. Which category of sewage includes liquid waste from hospitals and institutions, as well as body wastes and laundry wastes?

a) Sanitary sewage

b) Domestic sewage

c) Commercial sewage

d) Industrial sewage

Date: 31.12.2022 **Marks Secured:**

Answer All Multiple-Choice Questions (10 × 3 = 30)

30/30

1. What are the main characteristics that define sewage?

a) Its color and turbidity

b) Its chemical composition and physical condition

c) Its temperature and taste

d) Its source and origin

2. Which of the following is NOT a classification of wastewater based on its origin?

a) Sanitary

b) Commercial

c) Industrial

d) Agricultural

3. What is the term used for liquid waste from stores and service establishments that are similar in characteristics to household flows?

a) Sanitary sewage

b) Industrial sewage

c) Commercial sewage

d) Surface runoff

4. Why are combined sewage systems generally avoided?

a) They are too expensive to construct.

b) They cannot handle storm water.

c) They reduce the efficiency of sewage treatment plants.

d) They are not legally recognized in urban areas.

5. What is the primary purpose of treating storm water before discharging it into waterways?

a) To remove heavy metals

b) To conserve water for reuse

c) To prevent spills and overflows

d) To remove coarse solids and contaminants

ADD-ON COURSE: ANSWER KEY

Course Code : SDM2204

Course Name : SEWAGE DISPOSAL MANAGEMENT IN HOSPITALS AND INDUSTRIES

Date : 12.11.2022 to 31.12.2022 (All Saturday)

Course & Year : B. Pharm First Year

ANSWER KEY

1. Answer: b) Its chemical composition and physical condition
2. Answer: d) Agricultural
3. Answer: c) Commercial sewage
4. Answer: c) They reduce the efficiency of sewage treatment plants.
5. Answer: d) To remove coarse solids and contaminants
6. Answer: c) Industrial wastes
7. Answer: a) Odor problems and eco-toxicology
8. Answer: b) Watering plants
9. Answer: d) They contribute more flows than the system can handle.
10. Answer: a) Sanitary sewage

Evaluating the Following Questions

1. This Course was interesting

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

2. Was this course useful

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

3. During the course did you find any technical difficulties?

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

4. Did the resource person delivered the information, you didn't know already?

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

5. The subject matter was presented effectively

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

6. The resource person helped me learn about how the course works in the real world

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

7. The resource person provided information I can use to be successful in my career

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

8. Overall how do you rate the Training Program?

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

ADD-ON COURSE - SYLLABUS

Course Code : EED2205

Course Name : EVALUATION OF ECONOMIC VALUE OF DRUG THERAPY

Date : 07.01.2023 to 25.02.2023 (All Saturday)

Course & Year : M. Pharm Second Year

Course Objective : To improve public health through rational decision making when selecting among alternative therapies, e.g., for formularies and their impact on costs and outcomes

S.No	Topic	Hours
1	**Module-I:** Pharmacoeconomics Introduction, several stages of pharmaceutical research, Importance of the clinical area, Evaluating the economic value of drug therapy.	7
2	**Module-II:** Cost-of-illness analysis, Budget-impact analysis, Cost-minimization analysis, Cost-effectiveness analysis, Cost-utility analysis, Cost-consequence analysis, Cost-benefit analysis.	9
3	**Module-III:** Regardless of their structural form, several similarities across healthcare decision analyses exist, Application of Pharmacoeconomics	6
4	**Module-IV:** Principles, Methods and Economic Evaluation of Drug Therapies, Needs and ChallengesMulti-factorial Variability of Drug Pricing, Pharmacoeconomic Challenges, Pharmacoeconomic Evaluations and Components, Fundamentals Types of Cost, Types of pharmacoeconomic studies. Methods of Pharmacoeconomic Evaluation, Guidelines for Pharmacoeconomics Evaluations.	10

Course Outcome:

After the successful completion of this course, the student shall be able to:

- Pharmacoeconomics analysis is important for inclusion in formularies or coverage by the drug insurance companies.
- It assesses therapeutic advantages and disadvantages of the drug and cost-effectiveness of the drug relative to accepted therapy

EVALUATION OF ECONOMIC VALUE OF DRUG THERAPY (EED2205)

Name of Student: PRATHEEPA . S
Course & Year: M.Pharm Second year
Registration No: 261121516507
Semester:
Date: 25.02.2023
Marks Secured:

24/30

Answer All Multiple-Choice Questions (10 × 3 = 30)

1. What is drug repurposing primarily focused on?

a) Developing entirely new drugs
b) Finding new therapeutic uses for existing drugs ✓
c) Promoting over-the-counter medications
d) Creating brand-new pharmaceutical companies

2. What advantage does drug repurposing offer over developing entirely new drugs?

a) Lower safety concerns
b) Faster clinical implementation
c) Reduced intellectual property issues
d) All of the above ✓

3. which of the following is a computational approach used in drug repurposing?

a) Testing drugs in clinical trials
b) Analyzing drug databases
c) Developing new chemical compounds ✗
d) Conducting large-scale experiments

4. What is the process of molecular docking used for in drug repurposing?

a) Creating new chemical compounds
b) Determining drug safety
c) Identifying potential drug-protein interactions ✓
d) Patenting existing drugs

5. In drug repurposing, what are experimental studies typically focused on?

a) Developing new drugs
b) Analyzing drug databases
c) Testing existing drugs on different diseases ✓
d) Obtaining intellectual property rights

6. Which drug was originally used as a pain reliever but has been repurposed for cardiovascular disease prevention?

a) Aspirin

b) Ibuprofen

c) Paracetamol

d) Morphine

7. Thalidomide has been repurposed for the treatment of which conditions?

a) Cancer

b) Diabetes

c) Multiple myeloma and leprosy

d) Alzheimer's disease

8. What is a significant challenge in drug repurposing related to legal rights and ownership?

a) Ensuring safety and efficacy

b) Finding funding

c) Intellectual property issues

d) Computational analysis

9. What is a key consideration in ensuring the safety and efficacy of repurposed drugs for new indications?

a) Regulatory approval

b) Minimal side effects

c) High cost of production

d) Patent protection

10. How is drug repurposing expected to evolve in the future with advances in technology?

a) It will become less common

b) It will primarily focus on creating new chemical compounds

c) It is likely to become more common with advances in data analytics and drug discovery methods

d) It will only involve experimental studies

ANSWER KEY

1. Answer: b) Finding new therapeutic uses for existing drugs
2. Answer: d) All of the above
3. Answer: b) Analyzing drug databases
4. Answer: c) Identifying potential drug-protein interactions
5. Answer: c) Testing existing drugs on different diseases
6. Answer: a) Aspirin
7. Answer: c) Multiple myeloma and leprosy
8. Answer: c) Intellectual property issues
9. Answer: a) Regulatory approval
10. Answer: c) It is likely to become more common with advances in data analytics and drug discovery methods

ADD-ON COURSE - SYLLABUS

Course Code : DID2206

Course Name : DOSAGE INDIVIDUALIZATION: INTEGRATION OF PHARMACOMETRICS IN CLINICAL PRACTICE

Date : 07.01.2023 to 25.02.2023 (All Saturday)

Course & Year : M. Pharm First Year

Course Objective : The integration of pharmacometrics in clinical practice with a focus on dosage individualization aims to move away from a one-size-fits-all approach to drug therapy. Instead, it strives to consider individual patient characteristics to optimize treatment outcomes, minimize risks, and improve the overall efficiency and safety of healthcare delivery

S. No	Topic	Hours
1	**Module-I:** Drug development and regulatory application, Information to Support the Drug Discovery and Development Processes, Information to support a determination of safety and efficacy.	8
2	**Module-**II: Dose-concentration-response relationships, And effects over time, Dose and Concentration-Time Relationships, Concentration-Response Relationships.	10
3	**Module-III:** Designs of exposure-response studies, Population vs. Individual Exposure-Response, Measuring Systemic Exposure, Measuring Response.	9
4	**Module-IV:** Modeling of exposure-response relationships, General Considerations, Modeling Strategy.	5

Course Outcome:

After the successful completion of this course, the student shall be able to:

1. Pharmacometrics is a field that uses mathematical models to describe and predict how drugs are absorbed, distributed, metabolized, and eliminated in the body.
2. By integrating pharmacometrics into clinical practice, healthcare providers can optimize drug therapy for each patient, taking into account factors such as age, sex, genetics, renal function, and other individual characteristics.

DOSAGE INDIVIDUALIZATION: INTEGRATION OF PHARMACOMETRICS IN CLINICAL PRACTICE (DID2206)

Name of Student: AMARNATH
Registration No: 261122516501
Date: 25/02/2023
Course & Year: M.PHARM I-YEAR
Semester: I-SEM
Marks Secured: 30/30

Answer All Multiple-Choice Questions (10 × 3 = 30)

1. What is pharmacometrics?

A) The study of pharmacokinetics only.
B) A field focused on optimizing drug therapy using mathematical models.
C) The study of drug manufacturing processes.
D) The study of drug interactions with food.

2. Which data is primarily used in pharmacometrics to build models for drug dosing?

A) Genetic data.
B) Clinical trial data.
C) Social data.
D) Weather data.

3. What is the main goal of pharmacokinetic modeling?

A) To study the psychological effects of drugs.
B) To describe how the body absorbs, distributes, metabolizes, and excretes drugs.
C) To develop new drugs.
D) To study drug interactions with other substances.

4. Pharmacodynamics in pharmacometrics refers to:

A) The study of drug manufacturing processes.
B) The study of how drugs affect the body.
C) The study of drug interactions.
D) The study of drug interactions with food.

5. What is a population pharmacokinetic model used for?

A) Customizing drug dosages for individual patients.
B) Determining the cost of drug production.
C) Designing clinical trials.
D) Understanding drug-drug interactions.

Thookanaickenpalayam, Gobichettipalayam (TK), Erode (DT) - 638506, Tamil Nadu.

6. What does the term "PK/PD modeling" refer to in pharmacometrics?

A) The study of psychokinetics and psychodynamics of drugs.

B) The integration of pharmacokinetic and pharmacodynamic data to optimize dosing.

C) The measurement of patient satisfaction with medications.

D) The study of public knowledge about pharmacology.

7. In pharmacometrics, what does the term "exposure-response relationship" refer to?

A) The relationship between drug exposure and adverse effects.

B) The relationship between drug exposure and patient demographics.

C) The relationship between drug exposure and drug manufacturing.

D) The relationship between drug exposure and drug cost.

8. Which of the following is a key advantage of using pharmacometrics in drug development?

A) Reducing the need for clinical trials.

B) Increasing the cost-effectiveness of drug development.

C) Enhancing the safety and efficacy of drugs.

D) Eliminating the need for drug labeling.

9. What role does modeling and simulation play in pharmacometrics?

A) They are primarily used for marketing drugs to healthcare providers.

B) They replace the need for clinical trials.

C) They help predict drug behavior and optimize dosing regimens.

D) They are used to determine the shelf life of drugs.

10. Which of the following is NOT a type of pharmacometric modeling?

A) Population pharmacokinetic modeling.

B) Physiological pharmacokinetic modeling.

C) Nonlinear mixed-effects modeling.

D) Genetic pharmacodynamic modeling.

B) Increasing the cost-effectiveness of drug development.

C) Enhancing the safety and efficacy of drugs.

D) Eliminating the need for drug labeling.

9. What role does modeling and simulation play in pharmacometrics?

A) They are primarily used for marketing drugs to healthcare providers.

B) They replace the need for clinical trials.

C) They help predict drug behavior and optimize dosing regimens.

D) They are used to determine the shelf life of drugs.

10. Which of the following is NOT a type of pharmacometric modeling?

A) Population pharmacokinetic modeling.

B) Physiological pharmacokinetic modeling.

C) Nonlinear mixed-effects modeling.

D) Genetic pharmacodynamic modeling.

DOSAGE INDIVIDUALIZATION: INTEGRATION OF PHARMACOMETRICS IN CLINICAL PRACTICE (DID2206)

Name of Student: Deepika.P
Registration No: 261122516502
Date: 25/02/2023
Course & Year: M.pharm I Yr
Semester: I Sem
Marks Secured: 24/30

Answer All Multiple-Choice Questions (10 × 3 = 30)

1. What is pharmacometrics?

A) The study of pharmacokinetics only.
B) A field focused on optimizing drug therapy using mathematical models.
C) The study of drug manufacturing processes.
D) The study of drug interactions with food.

2. Which data is primarily used in pharmacometrics to build models for drug dosing?

A) Genetic data.
B) Clinical trial data.
C) Social data.
D) Weather data.

3. What is the main goal of pharmacokinetic modeling?

A) To study the psychological effects of drugs.
B) To describe how the body absorbs, distributes, metabolizes, and excretes drugs.
C) To develop new drugs.
D) To study drug interactions with other substances.

4. Pharmacodynamics in pharmacometrics refers to:

A) The study of drug manufacturing processes.
B) The study of how drugs affect the body.
C) The study of drug interactions.
D) The study of drug interactions with food.

5. What is a population pharmacokinetic model used for?

A) Customizing drug dosages for individual patients.
B) Determining the cost of drug production.
C) Designing clinical trials.
D) Understanding drug-drug interactions.

6. What does the term "PK/PD modeling" refer to in pharmacometrics?

A) The study of psychokinetics and psychodynamics of drugs.

B) The integration of pharmacokinetic and pharmacodynamic data to optimize dosing.

C) The measurement of patient satisfaction with medications.

D) The study of public knowledge about pharmacology.

7. In pharmacometrics, what does the term "exposure-response relationship" refer to?

A) The relationship between drug exposure and adverse effects.

B) The relationship between drug exposure and patient demographics.

C) The relationship between drug exposure and drug manufacturing.

D) The relationship between drug exposure and drug cost.

8. Which of the following is a key advantage of using pharmacometrics in drug development?

A) Reducing the need for clinical trials.

B) Increasing the cost-effectiveness of drug development.

C) Enhancing the safety and efficacy of drugs.

D) Eliminating the need for drug labeling.

9. What role does modeling and simulation play in pharmacometrics?

PHARMACEUTICAL PATENTS AND INTELLECTUAL PROPERTY STRATEGIES

(PPI2201)

Name of Student: SANJAY .K **Course & Year:** B.Pharm Final year

Registration No: 561994075 **Semester:**

Date: 30.01.2022 **Marks Secured:** 21/30

Answer All Multiple-Choice Questions (10 × 3 = 30)

1. **What is the primary purpose of obtaining a pharmaceutical patent?**
   a. To promote generic drug competition
   (b) To protect the investment in research and development
   c. To limit access to essential medicines
   d. To encourage international drug donations
2. **Which type of intellectual property protection grants exclusive rights to the inventor for a limited period, typically 20 years?**
   a. Copyright
   b. Trademark
   c. Trade secret
   (d.) Patent
3. **Which international agreement sets minimum standards for the protection of intellectual property, including pharmaceutical patents?**
   a. Paris Convention for the Protection of Industrial Property
   b. Kyoto Protocol
   (c.) TRIPS Agreement
   d. Vienna Convention on the Law of Treaties
4. **What is the term for the period during which a pharmaceutical patent holder has the exclusive right to make, use, and sell the patented invention?**
   a. Lifetime
   (b.) Indefinite
   c. Patent term
   d. Monopoly period

5. **What strategy is employed by some pharmaceutical companies to extend the exclusivity of a drug beyond the initial patent term?**
   a. Patent trolling
   b. Generic substitution
   c. Ever greening
   d. Parallel importing

6. **Which of the following is NOT a way that a pharmaceutical company can protect its intellectual property?**
   a. Filing for multiple patents on different aspects of a drug
   b. Entering into licensing agreements with competitors
   c. Seeking regulatory exclusivity through FDA approvals
   d. Publishing all research findings in the public domain

7. **What is the purpose of a "patent cliff" in the pharmaceutical industry?**
   a. To promote innovation and competition
   b. To extend the patent term of a drug
   c. To mark the end of a drug's exclusivity, leading to generic competition
   d. To facilitate international patent harmonization

8. **Which entity grants and manages patents for inventions in the United States?**
   a. World Trade Organization (WTO)
   b. United States Patent and Trademark Office (USPTO)
   c. European Patent Office (EPO)
   d. International Trade Commission (ITC)

9. **What is the primary objective of intellectual property strategies in the pharmaceutical industry?**
   a. To increase drug prices
   b. To hinder global access to medicines
   c. To protect and incentivize innovation
   d. To promote counterfeiting

10. **Which of the following is a form of intellectual property protection that does not require registration and relies on keeping information confidential?**
    a. Trademark
    b. Patent
    c. Copyright
    d. Trade secret

ADD-ON COURSE: ANSWER KEY

Course Code : DID2206

Course Name : DOSAGE INDIVIDUALIZATION: INTEGRATION OF PHARMACOMETRICS IN CLINICAL PRACTICE

Date : 07.01.2023 to 25.02.2023 (All Saturday)

Course & Year : M. Pharm First Year

ANSWER KEY

1. B) A field focused on optimizing drug therapy using mathematical models.
2. B) Clinical trial data.
3. B) To describe how the body absorbs, distributes, metabolizes, and excretes drugs.
4. B) The study of how drugs affect the body.
5. A) Customizing drug dosages for individual patients.
6. B) The integration of pharmacokinetic and pharmacodynamic data to optimize dosing.
7. A) The relationship between drug exposure and adverse effects.
8. C) Enhancing the safety and efficacy of drugs.
9. C) They help predict drug behavior and optimize dosing regimens.
10. D) Genetic pharmacodynamic modeling.

ADD-ON COURSE - SYLLABUS

Course Code : PCP2207

Course Name : PHARMACEUTICAL METABOLITES

Date : 11.03.2023 to 22.04.2023 (All Saturday)

Course & Year : Pharm. D Third Year

Course Objective : The investigation of pharmaceutical metabolites is crucial for a comprehensive understanding of drug behaviour in the body.

S.No	Topic	Hours
1	**Module-I: DEFINITION**–Consequences, Types	9
2	**Module-II: METABOLIZING ENZYMES**-Microsomal enzymes, Non microsomal enzymes	10
3	**Module-III: METABOLIC REACTIONS-** Oxidation reactions, reduction reactions, Hydrolytic reactions. Factors affecting drug metabolism.	12

Course Outcome:

After the successful completion of this course, the student shall be able to:

1. Acquire high knowledge about the pharmaceutical metabolites.
2. Have a critical way of thinking based on current health care development.

ADD-ON COURSE - SCHEDULE

Course Code : PCP2207

Course Name : PHARMACEUTICAL METABOLITES

Date : 11.03.2023 to 22.04.2023 (All Saturday)

Course & Year : Pharm. D Third Year

S. No	Topic	Hours
1	UNIT-I: DEFINITION–Consequences, Types	11.03.2023 DR. R. Thirumoorthi & DR. P. Mohanraj
2	UNIT-II: METABOLIZING ENZYMES-Microsomal enzymes	18.03.2023 DR. R. Thirumoorthi & DR. P. Mohanraj
3	Non microsomal enzymes	25.03.2023 DR. R. Thirumoorthi & DR. P. Mohanraj
4	UNIT-III: METABOLIC REACTIONS- Oxidation reactions, reduction reactions, Hydrolytic reactions.	08.04.2023 DR. R. Thirumoorthi & DR. P. Mohanraj
5	Factors affecting drug metabolism.	22.04.2023 DR. R. Thirumoorthi & DR. P. Mohanraj

PHARMACEUTICAL METABOLITES (PCP2207)

Name of Student: JERIF SAM SC
Registration No: 38002051650 7
Date: 22.04.2023

Course & Year: Pharm.D Third Year
Semester:
Marks Secured: 27/30

Answer All Multiple-Choice Questions (10 × 3 = 30)

1. What are pharmaceutical metabolites?

A) Medications used to treat metabolic disorders
B) Chemical substances produced when drugs are metabolized in the body ✓
C) Medications designed to enhance metabolism
D) Diagnostic tools for measuring metabolism

2. Which organ in the human body is primarily responsible for drug metabolism?

A) Heart
B) Kidneys
C) Liver ✓
D) Lungs

3. Why is drug metabolism important in pharmacology?

A) It helps in the synthesis of new drugs.
B) It ensures that drugs remain in the body indefinitely.
C) It can transform active drugs into inactive forms. ✓
D) It has no relevance to drug effectiveness.

4. Which enzyme system in the liver plays a major role in drug metabolism and is often referred to as the "drug-metabolizing enzyme"?

A) Cytochrome P450 ✓
B) Insulinase
C) Amylase
D) Protease

5. What is the primary purpose of Phase I drug metabolism?

A) To enhance drug bioavailability
B) To increase drug shelf life
C) To convert drugs into more potent forms
D) To make drugs more water-soluble for excretion

Principal
JKK Munirajah Institute of Health Sciences
College of Pharmacy, T.N.Palayam,

(Approved by Tamil Nadu Govt. & Pharmacy Council of India - New Delhi, Affiliated to The Tamil Nadu Dr. M.G.R Medical University, Chennai)
Thookanaickenpalayam, Gobichettipalayam (TK), Erode (DT) - 638506, Tamil Nadu.

6. Which of the following statements about drug metabolites is true?

A) Drug metabolites are always pharmacologically inactive.

B) Drug metabolites are the same as the parent drug in terms of chemical structure.

C) Drug metabolites are typically more potent than the parent drug.

D) Drug metabolites have no impact on drug efficacy or safety.

7. In the context of pharmaceutical metabolism, what does the term "prodrug" refer to?

A) A drug that is no longer effective

B) An inactive drug that is converted into its active form in the body

C) A drug that is eliminated from the body without metabolism

D) A drug that is used exclusively in pediatrics

8. Which route of drug administration bypasses the first-pass metabolism by the liver?

A) Oral administration

B) Intravenous (IV) injection

C) Subcutaneous injection

D) Inhalation

9. How can genetic variability in drug-metabolizing enzymes affect an individual's response to medications?

A) It has no impact on drug response.

B) It can lead to drug toxicity or lack of efficacy.

C) It ensures a consistent drug response in all individuals.

D) It only affects the absorption of medications.

10. What is the term for the process by which drug metabolites are eliminated from the body through urine or feces?

A) Excretion

B) Activation

C) Metabolization

D) Absorption

ADD-ON COURSE: ANSWER KEY

Course Code : PCP2207

Course Name : PHARMACEUTICAL METABOLITES

Date : 11.03.2023 to 22.04.2023 (All Saturday)

Course & Year : Pharm. D Third Year

ANSWER KEY

1. B) Chemical substances produced when drugs are metabolized in the body
2. C) Liver
3. C) It can transform active drugs into inactive forms.
4. A) Cytochrome P450
5. D) To make drugs more water-soluble for excretion
6. A) Drug metabolites are always pharmacologically inactive.
7. B) An inactive drug that is converted into its active form in the body
8. B) Intravenous (IV) injection
9. B) It can lead to drug toxicity or lack of efficacy.
10. A) Excretion

Evaluating the Following Questions

1. This Course was interesting

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

2. Was this course useful

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

3. During the course did you find any technical difficulties?

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

4. Did the resource person delivered the information, you didn't know already?

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

5. The subject matter was presented effectively

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

6. The resource person helped me learn about how the course works in the real world

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

7. The resource person provided information I can use to be successful in my career

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

8. Overall how do you rate the Training Program?

   a. Strongly Agree b. Agree c. Moderate d. Disagree e. Strongly Disagree

ADD-ON COURSE - SYLLABUS

Course Code : PMS2208

Course Name : PRECAUTIONS AND CONTROL OF PANDEMIC DISEASES

Date : 11.03.2023 to 22.04.2023 (All Saturday)

Course & Year : Pharm. D Second Year

Course Objective : Precautions and control measures during a pandemic are centred around protecting public health, minimizing the impact on healthcare systems, and ultimately saving lives.

S.No	Topic	Hours
1	**Module-I: Disease:** Introduction, Pandemic Disease, Objective of precaution. COVID-19	11
2	**Module-II:** Introduction and scope of the guidelines, Infection prevention and control recommendations,	10
3	**Module-III:** Health-care facility preparedness planning for acute respiratory infection epidemics, Research gaps	10

Course Outcome:

After the successful completion of this course, the student shall be able to:

1. The successful implementation of precautions and control measures for pandemic-oriented diseases can lead to reduced transmission, protection of vulnerable populations, resilience of healthcare systems, and ultimately, a quicker recovery with minimized health, economic, and societal impacts.
2. These outcomes underscore the importance of preparedness and rapid response to such health crises.

Answer All Multiple-Choice Questions (10 × 3 = 30)

1. What is the primary mode of transmission for most pandemic-oriented respiratory diseases?

A. Waterborne transmission
B. Airborne transmission
C. Foodborne transmission
D. Vector-borne transmission

27/30

2. Which of the following is a crucial measure for preventing the spread of pandemic-oriented diseases like COVID-19?

A. Frequent handwashing with soap and water
B. Consuming a diet rich in vitamin C
C. Avoiding physical exercise
D. Taking antibiotics regularly

3. What is the recommended social distancing guideline during a pandemic?

A. 1 foot (30 cm)
B. 3 feet (1 meter)
C. 6 feet (2 meters)
D. 10 feet (3 meters)

4. Which of the following is a personal protective equipment (PPE) commonly used by healthcare workers to prevent the spread of pandemic-oriented diseases?

A. Jeans and a t-shirt
B. A face shield and gloves
C. Flip-flops
D. Sunglasses

5. What is the recommended way to dispose of used tissues, masks, and other personal protective equipment during a pandemic?

A. Flush them down the toilet
B. Place them in a plastic bag and throw them in the regular trash
C. Leave them on the ground
D. Recycle them

6. Which of the following is NOT a symptom commonly associated with pandemic-oriented respiratory diseases like COVID-19?

A. Fever

B. Dry cough

C. Sneezing

D. Shortness of breath

7. What is the purpose of contact tracing during a pandemic?

A. To identify individuals at risk of contracting the disease

B. To ensure everyone gets vaccinated

C. To promote international travel

D. To stockpile medical supplies

8. Which organization is responsible for coordinating international responses to pandemics and other health emergencies?

A. United Nations (UN)

B. World Health Organization (WHO)

C. Red Cross

D. Centers for Disease Control and Prevention (CDC)

9. What is the recommended duration for self-isolation after being exposed to a pandemic-oriented disease or testing positive for it?

A. 24 hours

B. 3 days

C. 7 days

D. 14 days

10. How can vaccines contribute to the control of pandemic-oriented diseases?

A. By spreading the disease further

B. By weakening the immune system

C. By reducing the spread of the disease and protecting individuals

D. By increasing the severity of the disease

ADD-ON COURSE - SYLLABUS

Course Code : THT2209

Course Name : TIME MANAGEMENT TRICKS USING IQ BASED TECHNIQUES

Date : 11.03.2023 to 22.04.2023 (All Saturday)

Course & Year : Pharm. D First Year

Course Objective : Incorporating IQ-based techniques into time management strategies aligns with the goal of optimizing cognitive skills to make smarter decisions, improve productivity, and achieve better outcomes in both personal and professional endeavours.

S.No	Topic	Hours
1	**Module-I: INTRODUCTION:** What is IQ test, How is IQ measured, Can IQ Improve with time, How can I improve my IQ over time	10
2	**Module-II: ASSESS YOUR IQ**-Elon musk's IQ, How expensive is an IQ test, What was Einstein's IQ level, Does IQ test memory, Do people with high IQ struggle	10
3	**Module-III: IQ CALCULATION:** How IQ is calculated, Good IQ score, How to increase your IQ, what age is best for IQ, What is the different types of IQ	10

Course Outcome:

After the successful completion of this course, the student shall be able to:

1. Acquire high knowledge about "tricks to handle time with iq".
2. Have a critical way of thinking based on current health care development.

TIME MANAGEMENT TRICKS USING IQ BASED TECHNIQUES (TMT2209)

Name of Student: LOGESWARI R
Course & Year: Pharm. D I st year
Registration No: 38002[illegible]516509
Semester:
Date: 22.04.2023
Marks Secured: 27/30

Answer All Multiple-Choice Questions (10 × 3 = 30)

1) What is the main goal of time management, according to Brian Tracy's principles?

A) To increase the number of tasks completed
B) To achieve a sense of accomplishment
C) To minimize free time
D) To eliminate all non-essential activities

2) According to Brian Tracy, what is the "law of forced efficiency"?

A) The idea that tasks will expand to fill the time available
B) The principle of focusing on the most important tasks first
C) The concept of multitasking to get more done
D) The practice of delegating all tasks to others

3) Which time management technique suggests breaking your work into smaller, manageable tasks and focusing on completing them one by one?

A) Procrastination
B) Parkinson's Law
C) The 2-Minute Rule
D) The "Salami Slice" method

4) Brian Tracy emphasizes the importance of identifying tasks that contribute the most to your goals. What term does he use to describe these tasks?

A) Urgent tasks
B) Routine tasks
C) Quadrant 2 tasks
D) Busywork tasks

Munirajah Institutes of Health Sciences College of Pharmacy T.N.Palayam Erode Dt

5) What is the "ABCDE" method that Brian Tracy suggests for prioritizing tasks?

A) Categorizing tasks based on their complexity
B) Assigning a letter grade to each task based on its importance
C) Organizing tasks alphabetically
D) Setting deadlines for tasks

6) What is the primary goal of time management for students?

A) Maximizing leisure time
B) Achieving high grades and academic success
C) Completely avoiding social activities
D) Focusing solely on part-time jobs

7) Which of the following is a key benefit of effective time management for students?

A) Experiencing constant stress and burnout
B) Missing deadlines and assignments regularly
C) Improved academic performance and reduced stress
D) Allowing distractions to consume valuable study time

8) How can students prioritize tasks effectively?

A) By working on tasks randomly as they come up
B) By multitasking to complete tasks faster
C) By tackling the most important tasks first
D) By avoiding planning and going with the flow

9) What is the "Pomodoro Technique" for time management?

A) Juggling multiple tasks simultaneously
B) Studying only during daytime hours
C) Working for focused intervals followed by short breaks
D) Planning the entire week in advance

10) Why is setting realistic goals important for time management in student life?

A) To make tasks more challenging
B) To avoid achieving any goals at all
C) To maintain a constant state of stress
D) To stay motivated and measure progress
