organized Five Days Faculty Development Program on the topic of

"CURRENT TRENDS ON COMPUTER AIDED DRUG DESIGN"

EVENT REPORT

The Faculty Development Program on the topic of **"CURRENT TRENDS ON COMPUTER AIDED DRUG DESIGN"** has been organized by JKKMIHSCP, T.N. PALAYAM to all the faculty members from 07.03.2022 to 11.03.2022. The program began with welcome address followed by introduction of the speakers involved in the program.

The FDP was attended by faculties of JKKMIHSCP, T.N. Palayam.

The guest speakers gave suggestions about molecular docking and drug receptor interaction. They also gave some information such as ligand-based drug discovery and significance of CADD. The speakers also shared some information like methods of computational drug designing, identification of a lead compound and Pharmacophore.

OUTCOMES:

Upon completion of this Faculty Development Program, the participants became familiar with the CADD user interface. The participants can also understand the fundamental concepts and features of CADD. They were able to know the use of precision drafting tools in CADD to develop accurate technical drawings. The participants also understand how to draw and explain conventional representation of machine components and materials. They are also able to know the concepts of first and third angle projections and prepare drawing of simple machine elements. The primary focus of this FDP was databases, screening, virtual screening and molecular docking software program. The most frequently employed techniques and software programs between 2015 and 2020 were explained in this program.

Finally, the session was ended with queries and we got the clarification about the topics. We felt very happy and grasped more knowledge.
